STORM ALERT

Strong southwest winds will continue Wednesday through **south-central UT**, impacting all routes, including but not limited to I-15 (Cedar City to I-70 Jct), I-70 (entire route), US-6 and US-191. Motorists driving high profile vehicles are urged to keep alert to erratic winds and potentially hazardous driving conditions.

Mountain routes in south-central UT will accumulate snow this evening and overnight, as snow showers pick up there later in the day today.

For Tooele, Salt Lake, Weber and Davis valleys, the Thursday morning commute looks to be a slushy one.
